SKILLS React, Redux, Python, Flask, JavaScript,, AJAX, HTML5, CSS3, PostgreSQL, Git, Node.js

PROJECTS

Crypto-Robinhood (Flask , JavaScript, React, Redux, CSS3, PostgreSQL,)

[Live Site](#) | [Github](#)

Project based off of Robinhood.com and CoinMarketCap.com

- Leveraged external API from CoinGecko.com to get up to date price information on the cryptocurrency while using a setInterval to call the API every 40 seconds and update the page ensuring the most up to date information for the user.
- Facilitated the user's ability to search for cryptos with either name or symbolic inputs using Javascript filter methods to filter through cryptocurrencies saved in the Redux store.
- Created all backend API routes and Redux thanks to update the database so users can add cryptos to a watchlist or purchase.

Echo (JavaScript, React, Redux, CSS3, WebSockets, PostgreSQL, Flask)

[Live Site](#) | [Github](#)

Website based off of Discord.com

- Leveraged CSS modals to style an expressive and colorful splash page and allow for greater, single-page functionality.
- Employed Redux Thanks to send fetch requests to an API route allowing users to invite other users to owned servers.
- Constructed and allowed for users to create Servers and delete Servers while employing Redux thanks to send the fetch requests to an API created in Flask.

Table Top Tales (JavaScript, HTML5, CSS3, Pug, Express, Node.js, AJAX, PostgreSQL)

[Live Site](#) | [Github](#)

Website based off of Medium.com

- Built the splash and profile pages from the backend to the frontend and styling, through the use of PUG Templates and CSS.
- Leveraged Ajax to send fetch calls to backend routes and update the database to allow story creation and user following ability.

EXPERIENCE

State Farm | Richardson, Texas

Claim Associate - Auto

April 2017 – Sept 2019

- Received and reviewed claim information while applying claim handling procedures for processing, payment, and closing.
- Communicating with team members, business partners, and external customers which required contact by telephone, written correspondence, in-person, and other electronic media in order to close claim files and ensure consistency across teams.
- Applied knowledge of insurance contracts and endorsements, state laws and regulations, customer service philosophy, automotive repair methods and parts, medical and anatomical terminology to ensure compliance across processes.

Real Time Resolutions | Dallas, Texas

Customer Representative - Bankruptcy

Dec 2014 – March 2016

- Maintained a portfolio of collecting data from various sources, validating it and taking appropriate actions based on the analysis.
- Reviewed loan documents relating to origination, collateral valuations, research and document findings in detail, relating pertinent information to various parties such as attorneys, borrowers and court professionals.
- Recognized as top performer in 2015 in the bankruptcy department with respect to revenue netting over \$2 million.
